E-mail: Erwann.Maillot@terex.com**INTEGRATED LOGISTICS COMPANY EXPANDS FLEET
WITH ADDITION OF DEMAG® AND TEREX® CRANES**

ZWEIBRÜCKEN, December 22 2016 – In a massive fleet expansion, leading Middle East logistics provider, Integrated Logistics Company in Ahmadi, Kuwait, has taken delivery of a new Demag® CC 3800-1 crawler crane, 20 Terex® AC 100/4L all terrain cranes and 10 Terex Explorer 5600 all terrain cranes. The new cranes will join a fleet of more than 2,000 machines and be utilized by Integrated throughout the Middle East and North Africa (MENA) region. The company's Demag CC 3800-1 lattice boom crawler crane is the first of its kind in the region and will allow them to meet customers heavy-lifting demands.

“Our growth has been driven by the relentless pursuit being the best logistics provider in the region,” says Mr. Saleh Al Huwaidi, CEO at Integrated Logistics Company. “To achieve that reputation, it's vital for Integrated to have the best equipment available and work with equipment suppliers who do an outstanding job of supporting us. Since 2005, we have purchased more than 200 Terex and Demag cranes because the machines are built well, and the team at Terex Cranes is responsive to our needs.”

Integrated's new 650-tonne CC 3800-1 crawler crane has a maximum load moment of 8.484-meter tonnes and features a wide array of safety features, including the award-winning fall protection system. The company ordered the unit with a Superlift structure for increased lifting capabilities. “We selected the CC 3800-1 because of its ability to outperform larger 750-tonne class cranes in many applications,” adds Al Huwaidi.

The new AC100/4L and Explorer 5600 all terrain cranes are being deployed throughout Kuwait, Qatar and Saudi Arabia. Integrated has several ongoing projects that require the mobility and impressive lift capacities of these Terex units. “These mobile cranes have proven to be a versatility option for our crews with their extremely long booms,” explains Al Huwaidi. “Our operators also like the IC-1 Plus control system equipped on these machines, which gives them access to real-time calculations to improve the machine's performance at higher capacity ranges.”

The newly commissioned cranes join a vast crane lineup which includes two recently purchased 1200-tonne, Terex AC 1000-9 all terrain cranes, which were also the first and only mobile cranes of this lifting capacity in the region.

About Integrated Logistics Company

Integrated Logistics Co. KSC provides solutions to the logistics industry in the Middle East. It offers general transport services using low bed trailers, bulk carriers, fuel and container transportation, and tipper trucks; heavy lift services comprising hydraulic crane and heavy lifting services; fuel handling and distribution; and custom clearance and forwarding, including stevedoring and port operations, project management and engineering, factory-to-foundation, and logistics services. The company also provides earth moving equipment, wheel loaders, graders, excavators, scrapers, road rollers, backhoes, unloaders, material handling equipment, crawler and all terrain cranes, rough terrain and tower cranes, fork lifts, stationary equipment and power generators, welding machines, air compressors, tower lights, and sludge/water pumps on hire. In addition, Integrated Logistics Co. KSC offers engineering construction services for the supply, installation, testing, and commissioning of electro-mechanical works; automation and system engineering services; representing international companies representation; project management/integrated workplace management, and facility management; paperless office, enterprise document/drawing management, and workflow automation; business process consulting; and rehabilitation and environmental services, remediation treatment of soil and environmental services associated with drilling oil wells, and groundwater and thermal treatment. The company was founded in 2005 and is based in Ahmadi, Kuwait. For more information, visit <http://www.integrated-me.com/>.

About Terex

Terex Corporation is a global manufacturer of lifting and material processing products and services delivering lifecycle solutions that maximize customer return on investment. Major Terex brands include Terex, Genie, Powerscreen and Demag. Terex solutions serve a broad range of industries, including construction, infrastructure, manufacturing, shipping, transportation, refining, energy, utilities, quarrying and mining.
